

Great Southern Outreach Dinner & Research Presentation

Thursday 18 March

**You are invited to attend the
2021 Great Southern cystic
fibrosis research update and
outreach evening**

Guest speaker Associate Professor Anthony Kicic from Telethon Kids Institute will provide an overview about his breakthrough research in bacteriophage (phage) therapy.

Phage therapy is a unique way to treat anti-microbial resistant microbes which are becoming a common and significant global issue. Anthony's research focuses on how it's delivered successfully to CF airways.

Date: Thursday 18 March 2021

Time: From 6:00pm

Venue: Due South Albany

Drinks and dinner provided. This event is FREE, thanks to generous support from Telethon. Please note, RSVP is essential for catering purposes.
