

South West Evening with CF Scientists Dinner & Research Presentation

Thursday 19 August 2021

You are invited to attend the 2021 South West cystic fibrosis research update and outreach evening

Guest speaker Associate Professor Anthony Kicic from Telethon Kids Institute will provide an overview about his breakthrough research in bacteriophage (phage) therapy.

Phage therapy is a unique way to treat anti-microbial resistant microbes which are becoming a common and significant global issue. Anthony's research focuses on how it's delivered successfully to CF airways.
